NESTING SHOREBIRDS AND SEABIRDS OF TAMPA BAY

PRESENTED BY
HOLLEY SHORT, AUDUBON FLORIDA

Florida is home to multiple species of shorebirds and seabirds that live and breed on our sandy beaches. Sometimes these nests can be very secretive, and other times these nests can occur in colonies of hundreds of birds. Join Holley Short, Shorebird Program Manager of Audubon Florida to learn about five of these shorebird species that need our help to survive and thrive on some of the most popular beaches in Tampa Bay. Learn how to ID these birds, what to watch for when enjoying the beach, and how you can help if you see a bird in trouble.

FEB. 15 | 6:30 PM

Community Meeting Room
